

Nature and Us Citizens' Assembly

Appendix 2: Advisory Panel

Authors: Centre for Deliberative Research

Prepared for: Natural Resources Wales

Date: May, 2023

Lyn Cadwallader**Chief Executive, One Voice Wales since 2010**

Lyn has financial and operational responsibility for running One Voice Wales as the national representative body for the Community and Town Council sector in Wales. Prior to taking up his current post he had 19 years' experience of local government and the housing sector in South East Wales. He is a Geography graduate and hold postgraduate qualifications in Housing, Business Administration and Leadership. He has held a variety of roles on Welsh Government Advisory bodies since joining One Voice Wales and he is a member of the Chartered Institute of Housing, the WISERD Advisory Board and a former Chair of Monmouthshire Community Chest (SPORTLOT) Panel. He is a member of the National Trust and Gwent Wildlife Trust.

Claire Chappell**Head of Climate Behaviour Change & Engagement, Welsh Government**

Claire works within the Welsh Government's Climate Change & Energy Efficiency Division and is responsible for the national 'Climate Action Wales' public engagement programme. This includes leading on a national strategy and associated delivery plans to support and engage the people of Wales in action on climate change. Claire also leads on stakeholder engagement and ensuring a collaborative delivery approach towards engaging and communicating with the people of Wales on climate change and is responsible for organising the annual Wales Climate Week event.

Sandy Clubb**Involvement Artist, Office of the Future Generations Commissioner**

Sandy leads on involvement at the Office of the Future Generations Commissioner, including leading work to set the direction for the team over the next seven years through Our Future Focus. Sandy has been with the Future Generations team since 2020 and comes from a voluntary sector background having worked on involvement and volunteering projects in a range of settings from Sustrans Cymru to the National Trust and Macmillan Cancer Support. She is passionate about enabling communities to be more fully involved in decision making and building sustainable solutions for future generations in order to ensure a just transition.

Colleen Cluett**Change Analyst, Office of the Future Generations Commissioner**

Colleen is a Change Analyst focusing on advice and assistance in the Future Generations Commissioner's Office. In her role she manages the Office's programme for providing advice and assistance to public bodies and other stakeholders to implement the Well-being of Future Generations Act, including working with other organisations to ensure our support is collaborative and integrated. She is also part of the Public Body and PSB Team as a Public Body Lead for several national public bodies and regional public bodies and PSBs in South East Wales.

Tamsin Davies**Nature Recovery Campaign Officer, Royal Society for the Protection of Birds****Sara Elias****Senior Policy Officer, Public Health Wales.**

Sara is a Senior Policy Officer in the Policy Team, having joined Public Health Wales in 2022. Sara's current work focuses on a partnership with the Office of the Future Generations Commissioner for Wales on embedding long-term thinking into public policy making. Prior to this role Sara has held senior roles within Local Authorities and Charities, leading strategic policy and research teams

Tara Froggatt**Catchment scientist, Welsh Water****Caryl Haf Jones****Chairperson, Young Farmers Club****Jenny Lloyd****Programme Coordinator – Transition & Recovery Support Programme, Welsh Local Government Association**

Jenny co-ordinates the WLGA's innovative programme of decarbonisation and climate adaptation support to Welsh local authorities, sharing best practice from across Wales and beyond, and connecting officers and elected Members to help accelerate climate action.

Tomos Owen**Refugee Integration Lead, Oasis Cardiff****Sue Pritchard****Chief Executive Food, Farming and Countryside Commission**

Sue Pritchard is Chief Executive of the Food, Farming and Countryside Commission. Sue's background is in leadership, strategy, culture and change, with a portfolio career as a consultant and coach, a researcher and writer, and non-executive, including non-executive director and then chair of a Local Health Board in Wales. She sits on several academic advisory boards, is a Trustee of CoFarm Foundation and an Independent Governor at Royal Agricultural University. Sue farms a Soil Association accredited organic livestock farm in Monmouthshire, with a focus on farming for conservation.

Chris Roscoe**Nature and Us Advisory Group member, Marine Licensing Officer, Natural Resources Wales**

Chris is an Alumni of the Future Generations Leadership Academy. He's a member of the Nature and Us Advisory Group and a Marine Licensing Officer for Natural

Resources Wales, where he determines applications for activities within the Welsh inshore and offshore region. In his own time Chris has a particular interest in self-sufficiency and traditional craft, including hedge laying and stock keeping. He is also the Chair of the Cylch Meithrin Maenclochog charity, which operates the local nursery in his area.

Will Slocombe

Reader in English at University of Liverpool

Will Slocombe works in the Department of English at the University of Liverpool. He teaches and researches science fiction, especially representations of AI and futuristic technologies, as well as serving as Co-Director of the Olaf Stapledon Centre for Speculative Futures. He is also a founder member of FLiNT: Futures Literacy through Narrative.

Annie Smith

Head of Nature Policy and Casework, Royal Society for the Protection of Birds

Alice Teague

Deputy Director Marine, Welsh Government

Dr Caroline Verfuert

Centre for Climate Change and Social Transformations (CAST), Cardiff University

Caroline is a Research Associate in the Centre for Climate Change and Social Transformations (CAST) at Cardiff University. Her research focuses on low-carbon lifestyles, sustainable diets and food systems, and visioning research methods. She is interested in the question "How can we, as individuals and a society, live in a low-carbon, equitable, and sustainable future and how do we get there?". Recently, she has also worked as a Policy Research Fellow with the Welsh Government in the Strategic Evidence Unit. Prior to joining the CAST centre, she completed her PhD at the University of Sheffield.

Citizen Assembly Advisory Panel

Purpose

This advisory group has been convened by Natural Resources Wales to support the development and delivery of a citizen assembly as part of the Nature and Us programme. It is intended to build on the work carried out in the Nature and Us National Conversation, and to employ a 'Team Wales' approach to this work.

The outcomes of the assembly will directly shape the vision for our natural environment in Wales, the actions we take collectively with citizens for both nature and for people, and will guide how NRW and other organisations work

The Advisory Panel will be facilitated and managed by the Centre for Deliberative Research at NatCen Social Research, who are leading on the design and delivery of the citizen assembly.

The Advisory Panel will feed into four key areas:

1. The core questions framing the overall citizen assembly
2. The evidence chosen to be presented during the assembly
3. The delivery tools employed throughout the session
4. Working together to carry forward the recommendations made by the assembly

Ways of Working

Panel members agreed to bring the following to the group:

1. Willingness to create a shared vision, and purpose
2. Respect and trust amongst all
3. A space where everyone feels able to contribute
4. A space where everyone feels their contributions are heard.
5. Collaboration across organisations and individuals
6. Mutual respect in the context of trust in the common goal across different views and experiences
7. Shared learning from one another
8. Engagement across sectors, including local government, community organisations, town councils, and perspectives included ranging from agriculture to marine and other nature-focused organisations

Programme Contributions

Panel members will contribute the following throughout and after the programme:

1. Robust and trusted evidence sources and key messages for the citizens' assembly
2. Expertise, knowledge, ideas and experiences from the wide range of perspectives represented on the panel
3. Integration with other citizen engagement happening across Wales on the topic of visions of a good life to support societal transformation.
4. Links to Ministerial priorities, climate and nature emergencies, individual and group stories, and with other involvement activity across the wellbeing goals to ensure interdisciplinary opportunities are identified and realised.
5. Support the communication and implementation of the shared vision. This involves helping communicate outcomes clearly with the public and with other sectors, while feeding it into your own work.
